Persistent moderate to heavy rainfall resulted in the flooding and closure of multiple roads in the county; including CR 4077 and FM 148 in Terrell. The flooding continued into June 1st.				
Several disturbances in advance of a deepening upper level trough over the southwest states led to multiple rounds of showers and storms across North and Central TX. With wet soils already in place, flash flooding was the main weather concern during this time. However, with unstable air still in place, some storms were able to become severe with large hail and damaging winds.
